Tailwind CSS| Bootstrap | Node.js | Firebase | Cloudinary | SQLite

Tools: Git| GitHub | Bitbucket | Vercel | Trello | Slack | Jira | Tortoise SVN
ÁGIL | SCRUM

EXPERIENCE

Estudio Cactus – Spain, Valencia - Full-stack Developer   *June 2021 – June 2022*

As a Full-stack Developer at Estudio Cactus, I participated in the development of multiple websites for several international clients, using the Next.js framework. This experience allowed me to expand my knowledge and skills in full-stack development. In addition to development, I also had the opportunity to interact directly with some clients, which improved my communication and teamwork skills.

My period at Estudio Cactus was a valuable learning experience, where I was able to grow professionally as a developer and be part of projects together with my team.

GIGLON – Spain, Madrid- Frontend Developer   *July 2022 – September 2024*

As a Frontend Developer at GIGLON, I have been working with different frameworks such as React Native or Vue, to develop both mobile applications and websites for our clients. I participated in the development of our validation app, which is used in events all over Spain to validate and invalidate

event tickets. In addition, I have also redesigned the original GIGLON website and created new websites for clients using Vue.js.

My experience at GIGLON has allowed me to use my knowledge of React and Vue along with web design to create innovative solutions for our clients.
